

Regarding barrier-free access and viewing of exhibits

- Multipurpose restrooms catering for those in wheelchairs are located on the 1st, 3rd and 4th floors.
- Wheelchairs are available to be borrowed. Please inquire to the staff on the 1st floor ticket counter.
- * Please note that wheelchairs are limited in number.

- Writing devices are available at the 1st floor ticket counter.
- ▲ **The following exhibition rooms include effects and experiments that sudden and very loud sounds.**

2D Waku Eco Motor Land, 3C Denki Factory, 3D Electro Hall "Link to Cyberspace", 4F Construction World, 4I Science Stadium, 5D Mechanics, 5E Optics, 5G Orienteering, 5H Sounds, 5I Works

Magnifying glasses are available at the 1st floor ticket counter.

- ▲ **The following exhibition rooms include effects that emit flashing lights or very bright lighting:**

3C Denki Factory, 4I Science Stadium, 5E Optics, 5F Illusion A, 5G Orienteering, 5I Works

- ▲ **The following exhibition rooms include effects and experiments involving dark spaces:**

3C Denki Factory, 3D Electro Hall "Link to Cyberspace", 4C Tetsunomaru-koen 1 chome, 4B Synra Dome, 4I Science Stadium, 5E Optics, 5F Illusion A

- ▲ **The following exhibition rooms contain effects that include sensory illusions:**

5F Illusion A, 5G Orienteering

- ▲ **The following exhibition rooms contain effects and experiments that generate electromagnetic fields or static electricity:**

2D Waku Eco Motor Land, 3C Denki Factory, 4C Tetsunomaru-koen 1 chome, 4B Synra Dome, 4E Home Appliance Recycling World, 5G Orienteering, 5I Works

There is a restroom usable by ostomates on the 3rd floor.

*Note that hot water is not dispensed.

- There are baby seats in the multipurpose rooms on the 1st, 3rd and 4th floors, and in the 5th floor lactation space.
- There are baby chairs in the multipurpose rooms on the 1st, 3rd and 4th floors.
- There is a lactation space on the 5th floor. There is no hot or cold water.
- Please ask at the Science Museum offices on the 3rd floor about borrowing the baby cars.
- *Please note that wheelchairs are limited in number.

Automated external defibrillators (AED) are installed at the right side of the 1st floor main entrance and the Science Museum office on the 3rd floor.

The First Aid Room is inside the Science Museum offices on the 3rd floor (there are no medical staff in attendance so it is not possible to make diagnoses or provide medicine).

Dogs to assist the persons with disabilities (guide dogs, service dogs and hearing assistance dogs) are permitted to enter the building.

Please check the information board in the Museum for information about free Wi-Fi.

Requests to visitors

Smoking is prohibited in all parts of the Museum, as is the use of electronic and heated tobacco products (vaping).

Drinking and eating inside the exhibition rooms are prohibited. Please use designated areas (such as the Group Lounge, etc.) to eat and drink in.

- Do not run inside the Museum as it is dangerous.
- Please take care of children to ensure no accidents or their getting lost.
- The escalator is solely for ascending until 16:30. Please use the staircases to descend.
- Please don't leave your baggage behind while you look around the Museum. Either use the coin lockers on each floor or carry your baggage by yourself.
- Please do not carry baby cars on the escalators as it is dangerous.
- In the case of emergencies, please follow the instructions of Museum staff.

Science Museum Information

Opening hours

09:30 – 16:50
(last admission at 16:00)

Closing days

Certain Wednesdays*

Year-end holidays (December 28-January 3)

*The Museum opens on Wednesdays during the long school vacation periods.

Admission fees

	Adults	65 or over	Senior and Junior high school students	Children (aged four or over)
Individuals	950 yen	850 yen	600 yen	500 yen
Group	710 yen	710 yen	450 yen	350 yen
Special*	320 yen	320 yen	220 yen	160 yen

* Those with a Disability Certificate and one accompanying person

Tokyo Metro Tozai Line: About a 550m-walk from Exit 1b of Takebashi Sta.(T-08)
Tokyo Metro Tozai Line, Hanzomon Line and Toei Subway Shinjuku Line: About an 800m-walk from Exit 2 of Kudanshita Sta. (T-07/Z-06/S-05)

Shuto Expwy Inner Circular Route (outer loop): Straight after the Daikancho Exit
Shuto Expwy Inner Circular Route (inner loop): Straight after the Kitanomaru Exit

GUIDE MAP

Welcome to the Science Museum!

There are exhibition rooms displaying about 20 themes on the four floors from the 2nd to the 5th floor. You will be able not only to view the exhibits, but touch, move, drive or manipulate them and experience science and technology. Moreover, every day we host exciting experience-based programs including experimental shows and handicraft classrooms! Please try participating in them!

5th Floor	
4th Floor	● Light meals and refreshments (Closed : Irregularly) ● Group Lounge/Event Hall
3rd Floor	● First Aid Room ● Science Museum Office ①
2nd Floor	● Group Lounge/Event Hall
1st Floor	● Ticket Counter (Lost and Found) ① ● Museum Shop ● Group Reservation
Base ment	● Café Cruise (Closed : Irregularly) Seating for 250 people [Tel: 03 3212 3930] *Guidance on the staircase

Restroom

Multipurpose Restroom

Coin Lockers (deposit)

Baby Seat (in the lactation space for the 5th floor)

Light meals and refreshments

Group Lounge/Event Hall

Information

Automated External Defibrillator (AED)

Exhibition Rooms Floor Map

◆ The museum closes at 16:50 daily. Even if you are waiting in line or in the middle of your turn, some exhibits may have to end. We thank you for your understanding.

Event program

All program are only available in Japanese language

◆ The event programs are all subject to change, so please check the website or the exhibition room for details.
◆ Some event programs require numbered tickets to be distributed starting at the opening time of the day.

4B Synra Dome	Quota: 62 people each time	*Note: Admission not possible after program starts.	
Science Live Show "UNIVERSE"	Held on 2nd&4th Saturdays		Length: About 40 mins
This is a live science show conducted by researchers at the forefront of their fields. 14:00- / 15:30-			
4C Tetsunomaru-koen 1 chome			
Experimental Classroom	Held on weekdays		Length: About 15 mins
Experience the fascination of steel as a material through experiments! 11:00- / 15:00-			
Handicraft Classroom	Held on weekends and public holidays		Length: About 60 mins
Reservations have to be made by the person attending. Quota: five people each time. Eligible participants: Elementary school students and older. You can experience the fun of manufacturing through handicrafts using steel and metal. 10:30- / 14:00-			
4I Science Stadium	Quota: 36 people each time	*Note: Admission not possible after program starts.	
Bath Time Science	Held on weekends and public holidays		Length: About 15 mins
Watch experiments on buoyancy and a show using a bath bomb. 10:00-			
Light and color experimental room			Length: About 15 mins
The mechanisms of light and color used in cameras and printers are explained through various experiments. 11:00-			
Let's think about the worlds water through "filtering"			Length: About 15 mins
An introduction to filtering, which is a useful technique in solving problems in daily life and water shortages. 13:30-			
The power of lemons	Held on weekends and public holidays		Length: About 15 mins
This is an experimental show where you can learn through experiments about the limonene and citric acid contained in lemons. 14:30-			
3C Denki Factory			
Electricity, magnets and power	Not held on Tuesdays		Length: About 15 mins
This is an experimental show about electricity and magnets using original experimental devices. 11:30- / 14:00- / 15:30-			
3E Atomic Station Geo-Lab	*Note: Admission not possible after program starts.		
Lets' look at and measure radiation			Length: About 15 mins
This is a chance to observe the presence of natural radiation using measurement equipment. 10:50- / 14:15-			
What is geological disposal?	Quota : 6 people each time		Length: About 10 mins
An interactive experience where you can learn about the future of energy in society and deep geological repositories. 9:55- / 11:30- / 12:25* - / 13:10- / 14:35* - / 15:15- * The show is sometimes subject to suspension.			
3F Medicine Laboratory			
Challenge! Researching new medicine			Length: About 15 mins
Experiments focusing on the shape of medicines, and experiments to precipitate crystals from aqueous solutions are conducted. 11:00- / 13:30- / 15:00-			
2D Waku Eco Motor Land			
The mechanism making cars run	Held on Weekends, Monday		Length: About 15 mins
The characteristics of the running dynamism of cars are looked at using original models made by visitors. 11:30- / 15:00-			
2E Monodukurium	Quota: 10 people each time		
Laser original ruler	Held on Weekends		Length: About 60 mins
Fee charged. Restricted to certain visitors. Manufacturing experiences original rulers. 11:00- / 14:00-			

Experiments and handicrafts Images Fee charged Reservation on the day

Check the exhibition room for details.

2nd Fl.

2D Waku Eco Motor Land Motor vehicles
Here you can learn through experiencing the fun of cars and motorbikes, safety and environmentally-friendly technologies.
Note: Please note that some of the equipment cannot be experienced due to height restrictions.

2E Monodukurium Manufacturing
This is an exhibition of all sorts of equipment and products related to the evolution of "monodukuri (manufacturing)" technology. (Among other exhibits, you can see a laser processor.)
★ Paid Service ¥500 yen
● Ruler/acrylic medal manufacturing line
● Capsule toy machine "Kagikan gacha"

2F Bicycle Plaza Bicycle
Here you can learn about all the changes in the shape and technology of bicycles from past to present.

Group Lounge / Event Hall
Please check the museum information to see if the group lounge is available.

● Mirai Arcade
● Robot Soccer Game

3rd Fl.

3D Electro Hall "Link to cyberspace" Electrical machinery, electrons, information, communications
Here you will find an introduction to the links arising from the fusion of the two worlds of "things" and "information."

3E Atomic Station Geo-Lab Nuclear power
Here you can experience and learn about the various forms of energy in the world, the nuclear fuel cycle and deep geological repositories.

3F Medicine Laboratory Medicine
Here is an introduction to the history of medicine, its development and how to use it safely. Please take part in the introductory medicine researcher rally.

3C Denki Factory Electricity
Move the exhibits with your own hands to create all sorts of phenomena showing electricity.

The world of motors Motors
Here is an introduction to the basic principles of how motors rotate, their practical use and application with modeling using motors and more.

● Do you know coal?
● Mechanism of meteorological equipment
● Mt. Fuji produced by ALOS (Advanced Land Observing Satellite)
● Bearing laboratory
● Look inside the motor!

4th Fl.

4I Science Stadium
An experimental show is presented that seeks to find the principles and technologies of science used in everyday products around us.

4E Home Appliance Recycling World Recycling
Here clearly explaining how our lives are connected to resources through the recycling of familiar home appliances.

4F Construction World Construction
In this exhibition, that takes the form of a construction site, you can try out tower cranes, Earthquake protection device and enjoy all sorts of construction-related experiences.

4B Synra Dome FOREST
● Metal Factory
● Most car portion recycled

4C Tetsunomaru-koen 1-chome Steel
In this exhibition space that is based on the image of a park, you can feel with your own hands the fascination and amazement of steel.

5th Fl.

FOREST
Footsteps of Rallying Education, Science, and Technology
There is no commentary or explanation of the exhibitions in FOREST. It's a place where you can look for your own ways of playing and enjoying yourself, as well as creating your own unique experiences.

5I Works FOREST
In this room, you can experience giant soap bubbles, whirlwind devices, and exhibits created by the staff.

5D Mechanics FOREST
Here, you can experience the structure and movement of essential parts of a machine by moving your own body.

5E Optics FOREST
Experience each exhibit and explore the various properties of light.

5G Orienteering FOREST
The numerous exhibits on this floor all have tricks. Let's explore the science behind these tricks.

5F Illusion A FOREST
Is the brain easily fooled? Here, you can experience a variety of illusory experiences.

5B Illusion B FOREST
Just by changing your perspective a little, you can come across unexpected events.

5H Sound FOREST
Sound is not just something our ears hear, it is something with various forms.

5C Future - Quantum World Quantum technology
Here introducing the future society made possible by quantum technology.

Restroom Multipurpose Restroom Coin Lockers Baby Seat (in the lactation space for the 5th floor) Light meals and refreshments First Aid Room Information Group Lounge/Event Hall Automated External Defibrillator (AED)
